EDUCATION

Utah State University, Jon M. Huntsman School of Business Logan, UT
Bachelor of Science, Information Systems – Data Engineering Emphasis; Minoring in Data Analytics May 2026

- **GPA: 3.73**, while working 25 hours per week
- Member: Association for Information Systems (AIS), Student Organization for Cybersecurity, Analytics Solutions Center

TECHNICAL SKILLS

- **Data Engineering Core**: Python (Pandas, NumPy, APIs), SQL (SQL Server, MySQL, PostgreSQL), Excel Power Query, advanced formulas), OOP, Data Structures & Algorithms
- **Cloud & Tools**: AWS, Linux (foundational), GitHub, Jupyter Notebooks, Snowflake, dbt, Docker
- **Database & Visualization**: ERD design (Lucidchart, Figma), Tableau Desktop (certified), Power BI
- **Data Pipelines**: Web JSON/API, ETL workflows, structured and unstructured data processing

PROJECTS

Cryptocurrency Arbitrage Trader 2025

- Developed a Python-based crypto arbitrage detection program using NetworkX graphs and live API data to identify optimal multi-currency exchange paths and detect dis-equilibrium cycles.
- Automated data collection and storage of daily exchange-rate snapshots for 13 cryptocurrencies in CSV format, organizing datasets for analysis.
- Implemented trading logic by linking arbitrage signals to a trading API (e.g., Alpaca) to execute real-time paper trades on profitable currency-exchange cycles.

Global Religious Landscape Dashboard 2025

- Cleansed, merged, and transformed datasets using Pandas and Power Query to prepare accurate and analyzable data.
- Designed and developed an interactive Tableau dashboard and Story applying layout, color, typography, and Gestalt principles to visualize spatial, trend, and magnitude insights.
- Created an executive summary and delivered a 4-minute presentation synthesizing data insights, credibility, and policy implications for a UN-style audience.

Sportsbook Data Engineering Project – Group Project, 2 members 2025

- Designed and implemented a fully relational PostgreSQL data mart integrating multi-source sportsbook data (SQL Server + CSV), including schema design, ETL pipelines, ERD creation, and a comprehensive data dictionary.
- Engineered advanced data transformations for betting logic, including commission calculations, outcome determination, spread/over-under tagging, and game-level enrichment for analytics.
- Validated the data mart through complex SQL analytics and statistical modeling, building multi-query performance tests and linear regression models to predict customer value using engineered features and correlation analysis.

Stock Trading Strategy Simulator 2024

- Developed dynamic Python-based stock evaluator for 10 stocks based on time-series data retrieved via API
- Implemented 3 trading strategies - mean reversion, Bollinger Bands, and simple moving average - to generate daily buy/sell targets
- Utilized functions and dictionaries, exporting results in JSON format for further analysis to identify buying/selling points and storing results in CSV files for easy readability

WORK EXPERIENCE

ScyTek Laboratories Logan, UT
Shipping Quality Control Aug 2022 – Present

- Ensured secure handling and accurate processing of 25 shipments daily, maintaining 100% compliance with documentation protocols to maximize product shipment
- Collaborated with cross-functional teams of 20 employees, including production and customer service, to identify and resolve data inaccuracies, reducing labeling errors
- Utilized communication and tracking technologies to streamline workflows and maintain consistent communication for shipment verification and updates

Quick Quack Car Wash Providence, UT
Team Member Apr 2021 – Aug 2022

- Resolved customer inquiries for 500 customers daily, documenting incident reports to ensure operational transparency and enhance service quality
- Exceeded sales targets by 200%, leveraging interpersonal communication to increase membership adoption while upholding security of financial transactions
- Supervised 3-4 employees as shift lead, fostering a collaborative environment and driving efficient problem-solving to meet daily operational objectives
